

Michael Huziy

San Francisco Bay Area • (925) - 822 - 4587 • michaelhuziywork@gmail.com • [LinkedIn](#) • [GitHub](#)
Professional Summary

Software Engineer with a strong foundation in full-stack development, systems thinking, and problem-solving. Experience in optimizing workflows, automating processes, and improving system performance through structured architecture and dependency analysis. Resourceful and self-driven, leveraging AI-assisted development to accelerate research, debugging, and iteration while delivering solutions aligned with business impact.

Skills

Technical: Java • C++ • Python • React • JavaScript/HTML/CSS • Full-Stack Development • REST APIs, Webhooks & Integrations • Automation & Workflow Orchestration • AI Integration & Prompt Engineering • Databases & SQL Performance & SEO Optimization • Responsive & Mobile-First Design • Git / GitHub • Cloud Fundamentals

Core: Proactive & Self-Driven • Problem-Solving • System Thinking & Architecture • Detail-Oriented • Analytical Quick Learner • Adaptable • Team Collaboration

Experience

Software Developer - Rovensys, *August 2025 - Present*

- Developed a mobile first application for real-time product customization, **reducing quote turnaround from hours to seconds** while improving customer experience and driving sales of the company's primary revenue product.
 - **Rebuilt and stabilized the company's customer-facing web platform**, investigating and reverse engineering site architecture through source-level debugging, developer tools analysis, and modifying source code to implement custom functionality beyond standard capabilities.
 - **Improved organic search performance** through systemic optimization, increasing ranking positions by **15+ spots**, boosting daily indexed URL visibility by around **350%**, resulting in **4-5x** higher customer traffic.
 - **Engineered reusable SEO-optimized publishing templates** that enabled non-technical stakeholders to manage structured web content independently, reducing developer intervention for ongoing content operations.
 - **Centralized multi-platform lead ingestion** into a unified CRM system using APIs, webhooks, and automation tools, creating a single system of record for custom acquisition and eliminating fragmented workflows.
 - **Engineered automated lead routing and communication pipelines** for email/SMS follow-ups, reducing manual customer management overhead, improving response consistency, and streamlining daily sales operations.
 - Developed **AI-integrated customer interaction workflows** through voice and chat that automated lead capture, supported intake processes and aided customer queries during and outside standard business hours.
 - Built **LLM-driven workflow automation systems** capable of interpreting natural language requests and executing multi-step actions across business platforms, enabling non-technical staff to automate specific operational tasks.
-

Selected Projects

Biomedical Image Segmentation and Classification - Cedars-Sinai Medical Center Initiative

- Collaborated with Cedars-Sinai Medical Center to research and implement AI models in Python for medical imaging, addressing crucial healthcare challenges.
- Architected convolutional neural networks (CNNs), then trained and tuned them to analyze 7500+ MRI brain scans, accurately identifying tumor boundaries for use in medical diagnostics.
- Finalized model architectures and optimized data pipelines and model tuning/training to support real-time diagnostic insights, yielding a **5.6 percent improvement over the benchmarks**.

App Developer - The Furnace Teen Center

- Aided development of a scanner app, diagnosed and resolved deep technical issues preventing team development, and authored technical project documentation that **reduced onboarding time by 50–60%**
-

Certifications: Meta: Front-End Developer (2025) • Microsoft Certified: Azure Fundamentals AZ-900 (2026)

Education

B.S Computer Science | California State University, Monterey Bay

Seaside, CA | 08.2022 - 12.2024

Computer Science | Diablo Valley College

Pleasant Hill, CA | 08.2020 - 05.2022
